INTRODUCTORY NOTE.

These Statistical Tables have been prepared with the object of preserving the continuity of the returns relating to the Sea and Inland Fisheries of Ireland, which in previous years had been published by the Fisheries Branch of the Department of Agriculture and Technical Instruction, in the form of Appendices to the Annual Reports presented by the Inspectors of Fisheries.

On the present occasion a formal Report is not presented for the reason that there is nothing to record in respect of the national fisheries during the year 1922 beyond the fact that, owing to the disturbed condition of the country, the fisheries in that year touched the lowest point reached by them in a very long period indeed. The sea fisheries were hampered by lack of transit facilities, as well as by certain restrictions necessarily imposed by the Military Authorities : while the inland fisheries, in the absence of effective police control, suffered grave injury from the unrestrained activities of the poacher and other delinquents. The figures of quantities and value as printed in these Tables plainly show, by comparison with those for the preceding twelve months, the lamentable state of the industry in the year under notice.
